EDUCATION

BML Munjal University

B.Tech in Computer Science Engineering — CGPA: 8.4

Gurugram, Haryana

2025 – 2029

EXPERIENCE

BML Munjal University

AI & Data Automation Intern

Gurugram, Haryana

May 2026 – Present

- Developed an end-to-end academic intelligence platform using Python, Playwright, HTTPX, and local LLMs to automate faculty profile discovery, classification, and structured data extraction across global university websites.
- Built asynchronous data pipelines handling crawling, validation, deduplication, enrichment, and Excel/JSON export workflows, reducing manual research effort.
- Implemented structured logging, debugging workflows, fault recovery, browser automation, and large-scale web data processing pipelines for research intelligence applications.

Brightrays

AI & Data Automation Intern

Noida, Uttar Pradesh

June 2026 – August 2026

- Engineered automated research systems combining Python, Playwright, HTTPX, asynchronous pipelines, and local LLM inference to discover, classify, enrich, and structure academic intelligence from global university websites.
- Designed multi-stage data processing pipelines covering high-volume crawling, entity extraction, validation, deduplication, enrichment, and structured dataset generation across Excel and JSON outputs.
- Implemented resilient automation infrastructure with request orchestration, browser automation, structured logging, retry/recovery mechanisms, validation layers, and failure handling for long-running research workloads.
- Integrated LLM-assisted classification and information extraction into deterministic processing pipelines, converting unstructured web content into validated, machine-readable research datasets while minimizing manual intervention.

PROJECTS

Argos — Competitive Intelligence Platform | FastAPI, PostgreSQL, Supabase, LangGraph

2026

- Built a production-grade competitive intelligence platform using FastAPI, PostgreSQL, and Supabase to ingest, process, and analyze large-scale business intelligence signals.
- Designed REST APIs, PostgreSQL persistence layers, scheduled monitoring jobs, analytics systems, and outcome-tracking infrastructure supporting structured prediction lifecycle management.

Route Resilience & Disaster Simulation Platform | FastAPI, PyTorch, NetworkX, MapLibre, OSMnx

2026

- Developed a geospatial analytics platform that extracted road networks from satellite imagery, constructed graph-based transportation systems, and evaluated infrastructure resilience under disaster scenarios.
- Built FastAPI routing APIs, disaster simulation engines (flood/earthquake/blockage), graph analytics (shortest-path, centrality), and real-time dashboard across multiple Indian cities using OpenStreetMap + elevation data.

PortAI — Financial Intelligence Platform | Next.js, FastAPI, PostgreSQL, Supabase

2026

- Built a full-stack financial intelligence platform using Next.js, FastAPI, PostgreSQL, and Supabase featuring portfolio management, investment analytics, authentication, and automated research workflows.
- Designed REST APIs, authentication workflows, PostgreSQL data models, and responsive dashboards supporting real-time financial data visualization and reporting.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, SQL, HTML/CSS

Frontend: React, Next.js, Tailwind CSS, Redux

Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, Async Python

Databases: PostgreSQL, MongoDB, Supabase, Neo4j

Data Engineering: Playwright, HTTPX, BeautifulSoup4, Pandas, NumPy, LangGraph, LangChain

Cloud & DevOps: Docker, Git, Linux, Railway, Vercel, AWS, Microsoft Azure, Postman

Infrastructure: REST APIs, WebSockets, MQTT, API Integrations

CERTIFICATIONS

Microsoft Azure Computer Vision (2025)

Neo4j Certified Professional (2025), AWS VPC (2025)

ISRO Remote Sensing (2025)
